

Cemetery Report for August 2022

The State performed a ground penetrating radar test to the area nearest Peace Church by Trindle Road. We have not received any information on what they might or might not have found. This was no cost to us and was done as a way to allow a parking area to be placed on our property. We do not plan on moving forward with the parking area.

We had two cremation burials and one full burial in August.

Three burial plots were purchased in August.

The installation of the fence will take place on September 6, 2022
